PROJECTS

Tame The List, Task Manager

- Designed to help people with ADHD to stay focused and organized while gaining dopamine from tasks.
- Tracks the users time since last use and if the user doesn't log in for awhile will ask the user if they want to change the style of list
- Allows the user to time their tasks so the next time it's a race against themselves.

Code Master, LeetCode Clone

- Focused on problems for beginner devs.
- Created with a team
- Used NEXT.js with React.js and MongoDB
