Objective

Experienced professional transitioning into software development with a background in sales management and technical instruction. Currently pursuing a degree in Computer Programming and Analysis while leveraging certifications in Full-stack Web Development. Expertise includes the MERN stack, team training, and executing sales events, combined with technical proficiency in Java and C++.

Skills

- MERN Stack Web Development
- Java
- C++
- Python

EXPERIENCE

Integris Group, Orlando, FL — Agentic Engineer Intern

February 2026 - May 2026

- Rebuilt a customer self-service portal for a major hospitality company based out of Orlando
- Architected a single-source-of-truth owner-capability matrix on a production member portal (Next.js 16 / TypeScript / Prisma / Azure SQL) that drives booking, payment, and profile access from upstream account status, contract milestones, and account-type flags — replacing scattered conditional logic across 6+ pages with a pure domain function backed by 19 unit tests and applied uniformly at the page, server-action, and admin-tooling layers.
- Delivered admin observability and security tooling — a Prisma-backed reservation audit trail with navigator.sendBeacon abandonment detection that gives support staff one-click visibility into why a member's booking failed; session-bound impersonation cookies; application-layer interception (proven by unit tests) keeping admin and demo accounts out of the upstream booking API; and PII lockdown across auto-sync, self-edit, and admin-edit paths

EdX, Orlando, FL— *Instructional Staff*

March 2021 - March 2025

- Facilitated comprehensive student learning in full-stack web development processes, focusing on industry-standard best practices.
- Provided technical instruction and mentorship in HTML, CSS, JavaScript, and the full MERN stack (MongoDB, Express.js, React, Node.js).
- Guided students through collaborative team environments, teaching version control and project management for web development applications.
- Conducted detailed code reviews to identify bugs, enforce coding standards, and improve code efficiency.

EdX, Orlando, FL— *Central Grading Staff*

December 2022 - September 2023

- Evaluated and graded complex technical assignments across the entire Full Stack bootcamp curriculum.
- Delivered organized, high-precision feedback to guide students toward academic and technical success.
- Debugged student submissions to identify logic errors and provided specific, actionable instructions for code correction.

Kelly Price & Company, Winter Park, FL— *REALTOR*

March 2019 - September 2024

- Managed the full client lifecycle, including lead generation, file maintenance, and long-term relationship management.
- Analyzed market trends to identify optimal rental or purchase opportunities for diverse client needs.
- Executed comprehensive marketing strategies to list and sell residential properties effectively.

EDUCATION

Valencia College, Orlando, FL— *AS/BS: Computer Programming and Analysis*

January 2025 - Present (AS: Summer 2026 BS: Spring 2028)

UCF Coding Bootcamp, Orlando, FL— *Certificate in Fullstack Web Development*

April 2017 - October 2017
